Exploring Equality, Equity and Access

EQUITY and EQUALITY

Equality everyone is given the same resources or opportunities.

Equity recognizes that each person has different circumstances and allocates resources and opportunities needed to reach an equal outcome.

ACCESS

Access seeks to provide equitable accessibility to all people in a programmatic or systemic framework.

A removal or reduction of barriers to participation by ensuring that information, services and facilities are accessible to all people.
Exploring Inclusion and Belonging

**Inclusion** is the act of establishing philosophies, behaviors, policies, practices, and procedures that ensure equitable access to opportunities and resources that support individuals in contributing to an organization’s success.

**Belonging** is a feeling that is purposefully cultivated in a culture that allows one to thrive by being encouraged to be who they are, fostering a sense of safety, desire for engagement, encouraging creativity and innovation.

"The most common cause of failure in leadership is produced by treating adaptive challenges as if they were technical problems."

- The Practice of Adaptive Leadership
Technical Problems

Have experienced before and possess the resources and understanding to successfully solve.

- May be very complex and critically important
- Solutions come from authority/experts
- Solutions grounded in current structures, procedures, and ways of doing things
Adaptive Challenges

- Usually have not encountered before, and a clear solution is not apparent.

- Solutions require changes in people’s priorities, beliefs, habits, and loyalties
- Expertise of people in authority not good enough
- Others must be mobilized in problem solving
- Evolutionary and involves individual and organizational loss
- Some trial and error
- Generative thinking
Adaptive Challenges

How do you know if you’re facing an Adaptive Challenge?

- It’s not clearly defined.
- You don’t have all the information or a process to find information.
- You feel it in your heart, gut and your mind.
- It challenges deeply held behaviors, practices and ways of working.
- Stakeholders involved need to be engaged and brought along.
- It requires learning and risk-taking to reach a solution.

To Ponder as You Proceed

When you think of “leaders” or “professionalism”:

- Do you think it might be influenced by any bias or proximity?

- If so, are you open to any of that being unhelpful and experimenting towards a new outcome?
To Ponder as You Proceed
