

# SENSORY ROOM Development Guide

Premiere provider of equipment, design, training and service of sensory rooms for over 25 years.

# WHAT IS A MULTI SENSORY ENVIRONMENT?

Multi Sensory Environments (MSE) or Sensory Rooms are dedicated, flexible spaces where individuals can experience a wide-range of sensory stimulation to assist with regulation, relaxation, therapy and/or learning.

There are several key elements a MSE/Sensory Room should have to be successful:

**Comfortable/Welcoming** - A safe place to learn and relax.

**Empowering** - A place that allows an individual to take the lead and explore at his or her own pace.

**Variety** - Provide a wide range of opportunities.

# ANY SIZE ANY BUDGET

WE CAN MEET YOUR NEEDS!

# THINKING OF CREATING A SENSORY ROOM?

We have been designing and installing MSEs/Sensory Rooms throughout the world for over 25 years. Our consultants are trained by experts in the field assuring the most comprehensive and versatile rooms possible.

## We listen to you...

Our **FREE consultation service** includes a conversation to obtain information about your goals, population served, budget and how we can make your dream of having a sensory room a reality.

From this conversation, we make recommendations and create a full-color design and quote that includes everything (even some things you might not have thought of) to make your room a success for years!

**If plans change, no worries!** We will work with you until you are happy with the design and equipment selection.

## Training is as important as design...

Having a sensory room is fantastic, but if you aren't sure how to use it in a variety of situations, you run the risk of under utilizing your investment. The **TFH Training Program** provides online and on-site training. Contact us to learn more (800-467-6222).

# 3 SIMPLE STEPS

*To Your Multi Sensory Room*

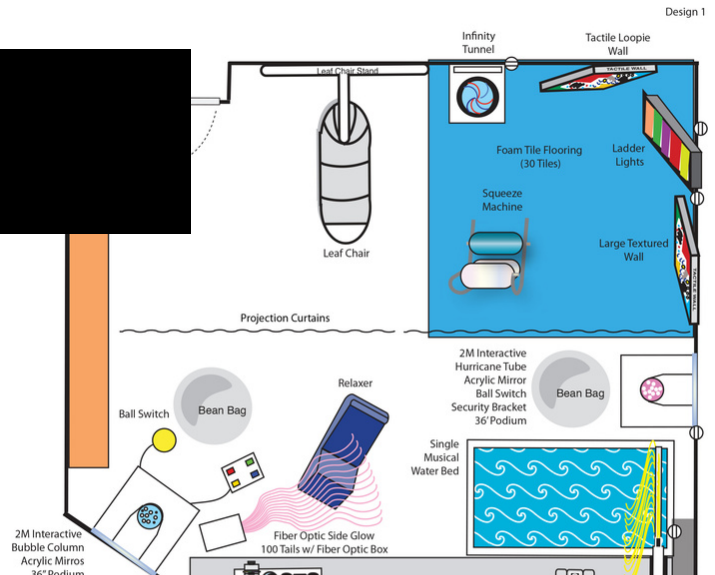

## 1. Contact Us

Contact us by email ([mse@tfhusa.com](mailto:mse@tfhusa.com)) or 800-467-6222 to schedule your FREE Virtual Consultation! Be prepared with information on population services, size of space & your goals for the room.

## 2. Design

During your conversation, the equipment & design of your space will be discussed. Following the initial conversation, you will receive a computer-generated design to review. We provide you with insights and suggestions to create a successful room and work with you until you are happy!

## 3. Ship

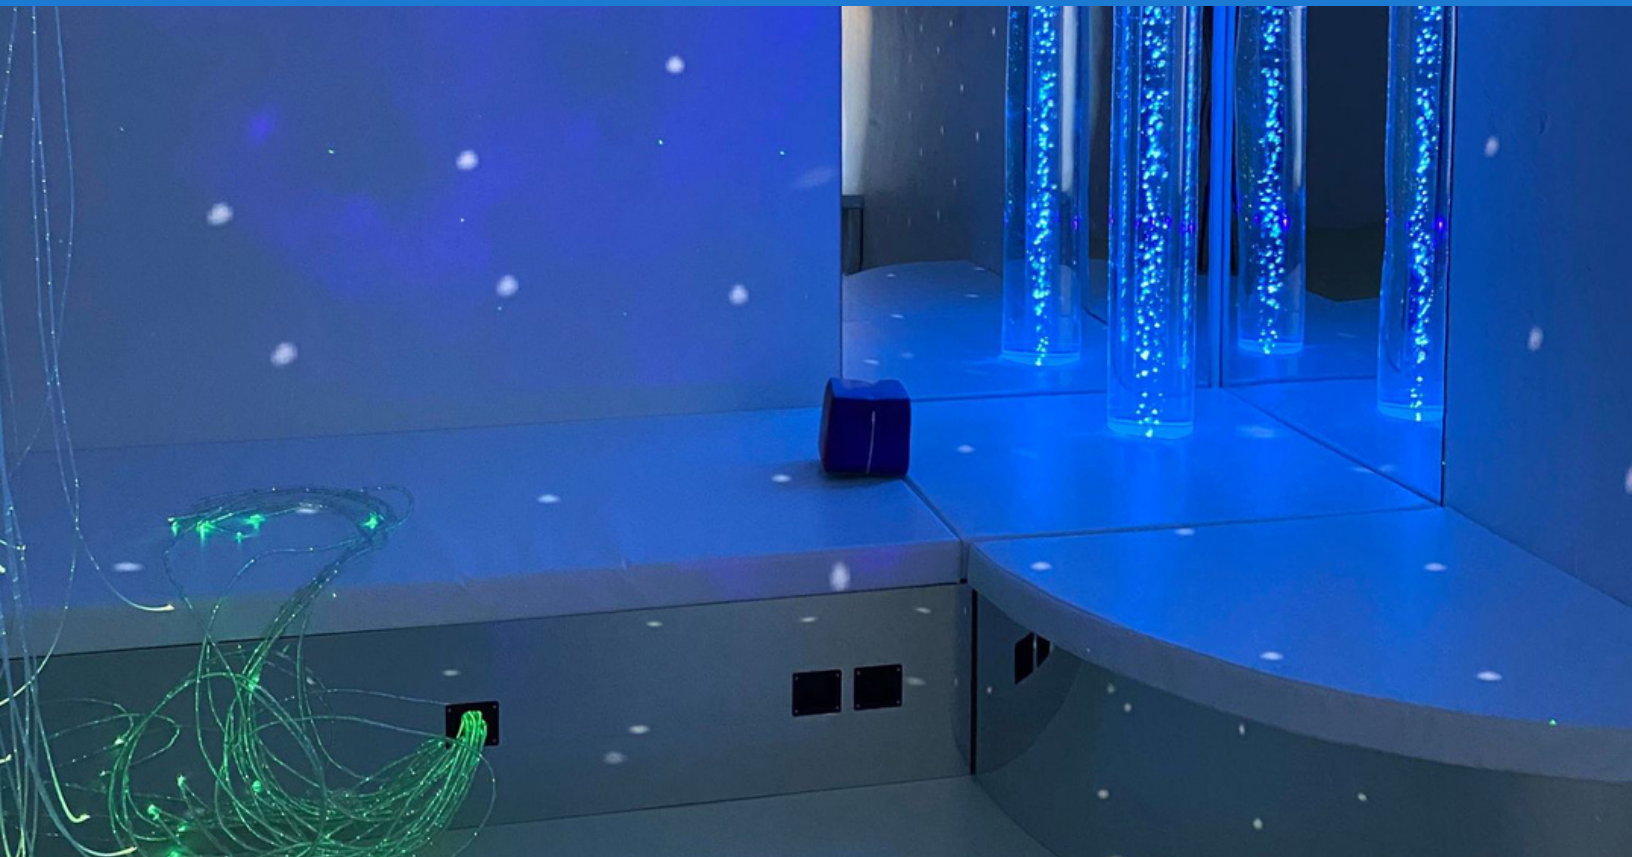

Once you approve the design & quote & place your order, we will coordinate the shipping of your equipment. We maintain a large warehouse in the U.S. and we ship quickly!
