friEdOnline
THE TECH-INFUSED CLASSROOM
For English Language Learners

5-hour course

friEdOnline
THE TECH-INFUSED CLASSROOM FOR ENGLISH LANGUAGE LEARNERS
A Guide for Success

Course Outline

Create a Culture of Learning

Learn how to cultivate a supportive environment, grow relationships, communicate expectations, and set norms in order to manage a digital classroom with English Language Learners (ELLs).

Create a Blended Learning Environment

Understand what blended learning is and how to successfully foster a digital learning environment for ELL students.

Create an Action Plan, design a learning environment, and explore instructional strategies.

Brain Boosts for Engagement

Understand the benefits of integrating brain–based learning into your ELL instruction.

Explore and create as you try music, movement, and game–based boosts.

Accommodate with Digital Tools

Explore a variety of tools to increase readability for ELL students.

Practice making learning accessible to all learners, including browser tools to support accommodations.

Create a dynamic classroom culture in a tech-infused environment that meets the needs of your 21st-century English Language Learners. Participants will learn to prepare effective lessons that not only engage ELL students, but promote critical accommodations with brain-based approaches.

This course is ideal for teachers of English Language Learners wanting to integrate technology in their classroom and it is a recommended component for new teacher professional development.
