

Expand your occupational therapy capacity

Give your on-site team relief and meet the growing needs of your students.

Presence has been providing online occupational therapy services to students throughout the nation on our HIPAA and FERPA compliant platform since 2009. Our licensed occupational therapists (OTs) have master's degrees or above, have active NBCOT certifications, and are supported by a team of clinical experts with deep teletherapy and pediatric experience. A growing body of research supports the efficacy of online OT, and this mode of service delivery is recognized by the AOTA.

Online Occupational Therapy services can help you:

- Expand clinical capacity via access to a large network of credentialed OTs
- Improve staff schedules and efficiency
- Save time and budget—no more recruiting
- Consult with on-site staff to improve sensory processing or regulation in classroom
- Gain insight via online progress monitoring of IEP/504 goals
- Minimize on-site grouping size in order to provide more individual or customized sessions

Online occupational therapists (OTs) perform the same function as onsite therapists.

All services are directed by each student's IEP or 504 plan and are delivered in one-on-one, small-group, or classroom settings.

The majority of our school-based OT offerings focus on skills that fall into four categories—all of which can be successfully treated online.

These categories include:

- Sensory integration
- Fine and gross motor skills
- Visual-motor and visual perceptual skills
- School-related self-care skills

“ We are forever grateful to you for helping [my child]* overcome her social phobias to where she is now outgoing and friendly! After all of [my child]'s* school traumas, the Presence format was her first critical step to trust people again and experience positive enjoyable interactions.”

**— PARENT OF STUDENT
WITH AUTISM**

Our providers can complete the full scope of work for OTs, including:

- Complete all required paperwork within the IEP and Medicaid billing system as appropriate
- Contribute to IEPs and attend meetings
- Track and report on student progress
- Schedule therapy sessions
- Communicate with parents and staff

Online occupational therapy made easy

Our goal is to make integrating Presence's services as seamless as possible

- Our experienced clinical team will collaborate with your district representative to determine priorities and needs
- We carefully identify providers in our network who are best suited to meet your needs and assist your team in processing student referrals. We know that timeliness and quality are critical
- Our providers consult and collaborate with your onsite team and parents about our digital platform before services begin
- Our clinical teams provide continual support to ensure a successful collaboration throughout the duration of our partnership with your district

The Presence platform

Our OTs use the Presence platform, an online therapy and evaluation tool. This platform makes it possible for sessions to take place anywhere that has a computer and an internet connection: a resource room, a classroom, a computer lab, the library/media center—or even at home for virtual or homebound students.

The platform is HIPAA and FERPA compliant, and best of all, students find it fun!

- Large library of curated therapy activities and interactive resources
- Clear and consistent video and audio; clinical controls to manage student engagement
- Interactive digital whiteboard, therapy tools, and games
- Use of manipulatives in onsite sessions include writing tools, scissors, paper, putty, beads, coins, zippers, shoelaces, and much more
- Access to dual and second integrated camera mode for enhanced therapy capabilities
