C-Pen Reader 2 & 3 for Speech-Language Pathologists

scanning pens
UNITED STATES

Assistive technology is essential for Speech-Language Pathologists (SLPs) in supporting literacy and communication. The C-Pen Reader 2 and 3 offer portable, user-friendly tools that promote independence and engagement across diverse learning needs.

Pain Points & Needs

- Limited access to AAC and AT training (74% of SLPs feel underprepared)
- Inconsistent delivery of AT services across settings
- High caseloads and limited time for individualized support
- Need for tools that promote independent communication and literacy
- Desire for multi-sensory learning tools to support diverse learners

How C-Pen Reader 2 Helps

- **Text-to-Speech:** Reads printed text aloud to support decoding and fluency
- **Built-in Dictionary & Definitions:** Supports vocabulary development and comprehension
- **Practice Mode:** Reinforces pronunciation and word meaning through spaced repetition
- **No Internet Required:** Fully self-contained for use in therapy or classrooms
- **Multi-Sensory Learning:** Combines visual and auditory input for better retention

How C-Pen Reader 3 Enhances Support

- **Touchscreen Interface:** Highlights text as it's read for visual reinforcement
- **Voice Memo Recording:** Allows students to practice expressive language
- **40+ Language Support Online:** Ideal for multilingual learners and ELLs
- **Bluetooth & Wi-Fi:** Enables integration with other devices and updates
- **Gamified Literacy Practice:** Boosts engagement and confidence

C-Pen Reader 2 & 3 for Occupational Therapists

scanning pens
UNITED STATES

Occupational Therapists use tools like the C-Pen Reader 2 and 3 to help clients overcome learning and daily living barriers. These assistive technologies promote independence, accessibility, and engagement across therapeutic and real-world settings.

Pain Points & Needs

- Need for tools that promote independence in daily tasks
- Barriers to function due to cognitive, motor, or sensory challenges
- Ethical concerns around usability, autonomy, and long-term suitability
- Importance of matching technology to client's evolving needs and environments

How C-Pen Reader 2 Helps

- **Portable & Lightweight:** Promotes independence in reading tasks
- **Graphical Interface:** Supports users with cognitive differences
- **Audio Boost:** Useful in noisy environments or for clients with hearing challenges
- **No Setup Required:** Easy to use without external devices or internet

How C-Pen Reader 3 Enhances Support

- **Customizable Reading Experience:** Adapts to client preferences and needs
- **Offline & Online Modes:** Flexible for different environments and access levels
- **Built-in Library:** Stores scanned text and voice notes for later use
- **Multi-Language Support:** Useful for clients with diverse backgrounds
- **Long Battery Life:** Reliable for use in therapy or home settings
