

Universal Screening That Moves You to Action

Identify the social, behavioral, and stress-related needs of every student and turn results into support with our end-to-end universal screening services.

Why Schools Must Act Now

- **20% of children** have been diagnosed with a mental, emotional, or behavioral condition.
- **80% of public schools** report that the pandemic has impacted social-emotional and behavioral development.
- **42% of students** report persistent sadness or hopelessness.

Behavioral and mental health needs are rising, and so is the demand for schools to respond quickly and proactively with the right services for students in need of additional support.

What Universal Screening Does

Universal screening provides every student with an equal opportunity to be seen and supported.

In just minutes, you can identify risk early, monitor trends, and guide decisions for tiered interventions while keeping the process manageable for staff.

Why It Matters

The SSIS tools are validated through peer-reviewed research—including multi-country studies—and directly link to evidence-based interventions like SSIS CIP and CIP-T2.

The Tool Behind the Process

SSIS Brief Universal Screener for Social & Behavioral Health

- **Multi-perspective:** completed by students, teachers, and families
- **Fast:** ~ 7 minutes per participant
- **Comprehensive:** covers K–12, with self-report from grades 3–12
- **Accessible:** Surveys are WCAG 2.2 AA compliant. Available in Spanish and English.
- **Actionable:** Results show social skills, stress management, and behavioral indicators, with reports available at the student, class, school, and district levels.

From Screening to Support: How eLuma's Universal Screening Service Works

Plan

We work with your team to set goals, identify student groups, plan communication and consent, and establish timelines that fit your calendar. MTSS teams meet at set checkpoints throughout the year to ensure results drive real action.

Screen

We configure and launch the SSIS screener, train your staff, and ensure everyone is confident using it. Each form takes only a few minutes, minimizing classroom disruption.

Interpret

After screening, eLuma consultants guide your team through the data, explaining resilience and behavioral indicators and helping you make sense of the trends. We also prepare clean exports for your SIS and MTSS systems.

Act

Data becomes action. Results align directly to SSIS CIP (Tier 1) and CIP-T2 (Tier 2), so teachers know exactly where to start. When individual support is needed, eLuma can provide licensed counselors, school psychologists, or clinical social workers from our national network.

Monitor

We schedule checkpoints at the beginning, middle, and end of the year to help you identify progress and trends across cohorts and subgroups.

Why choose eLuma?

- ✓ **Comprehensive support:** from setup to intervention
- ✓ **Validated tools:** trusted by educators and researchers alike
- ✓ **Actionable Insights:** data you can immediately use to guide support
- ✓ **People-powered results:** expert consultants and licensed providers ready to help your students and staff succeed

Don't just screen—act. Turn data into immediate support with eLuma.
