

Beyond the Plan. Proof It's Happening.

Know Accommodations Are Being Delivered. Have the Record to Prove It.

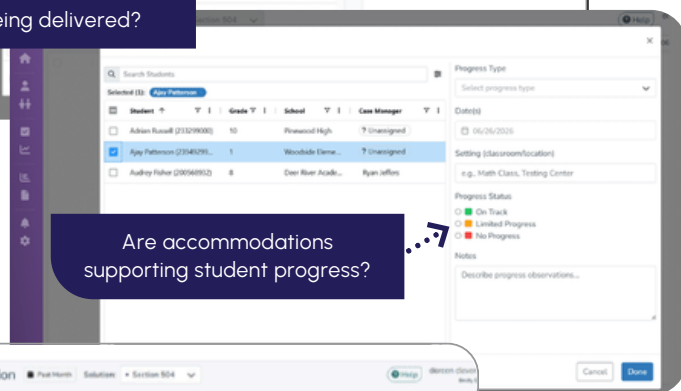

Your district already has a process for creating 504 plans. Brolly 504 picks up where the plan leaves off, helping teams document accommodation delivery, monitor student progress, and maintain a clear record of implementation.

Brolly 504 helps make implementation visible and accountable.

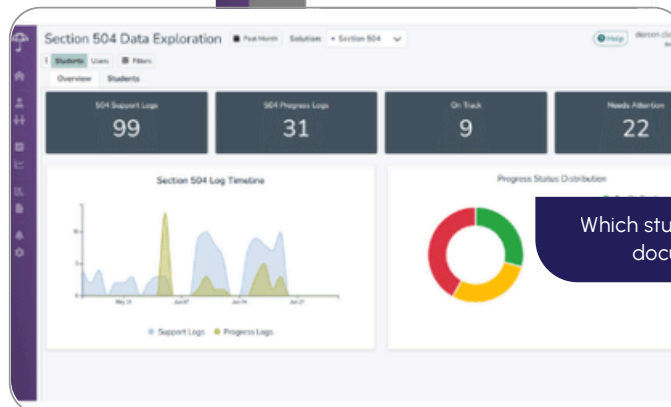

Brolly 504 gives teachers a fast way to document accommodation delivery and gives coordinators a timestamped, audit-trailed record of implementation. Districts can connect accommodations with student progress, identify documentation gaps, and build defensible evidence that plans are being followed and working.

Are accommodations actually being delivered?

Are accommodations supporting student progress?

Which students are missing documentation?

Every Accommodation, Clearly Accountable.

FULL AUDIT TRAIL

Keep 504 Plan Data Connected

Brolly syncs nightly with your existing 504 system to pull in accommodations and modifications, giving teachers a ready-to-use record for documenting implementation and student progress without copying plan language or managing duplicate entries.

Build a Defensible Record of Implementation

Every support log captures the student, teacher, date, and setting with an automatic timestamp. Edits are tracked, giving 504 coordinators a complete, traceable record of what was documented and when.

Make Documentation Work for Teachers

Teachers can log accommodations for an individual student or in bulk, making it easier to maintain consistent documentation without turning support logging into another time-consuming task.

PROGRESS TIED TO ACCOMMODATIONS

See Whether the Plan Is Working

The **504 Plan Effectiveness Report** connects accommodation delivery data with student outcomes, helping teams see both whether supports were implemented and how the student is progressing.

Monitor the Progress That Fits the Student

Track progress using grades, attendance, behavior, observations, or test scores at the cadence appropriate for each student. Supports logging and progress monitoring stay connected in one system, giving coordinators a more complete view of plan implementation and effectiveness.

PROACTIVE GAP DETECTION

Find Missing Documentation Before It Becomes a Bigger Problem

The **504 Compliance Summary Report** surfaces students who aren't being documented and identifies where gaps exist by teacher. Automated notifications alert coordinators when documentation lapses, helping teams follow up sooner instead of discovering missing records during a compliance review.

See Where Attention Is Needed

View documentation gaps across the district, then drill down by school, teacher, or student to pinpoint where follow-up is needed.

PROACTIVE GAP DETECTION

Bring IEP and 504 Tracking Together

Deploy Brolly 504 standalone or alongside Brolly IEP. Districts using both can manage their IEP and 504 populations within one system, while teachers and coordinators work within familiar platform logic instead of learning another separate tool.

Ready to See Brolly 504 in Action?

See how Brolly 504 can help your district document accommodation delivery, connect supports with student progress, identify documentation gaps, and maintain a defensible record of implementation.
